Lenze Relocates Electromechanical Production Operations

Move to HQ in Uxbridge, MA, with large local sales and support office to remain in the Chicago, IL area

UXBRIDGE, MA, July 01, 2019 – Lenze Americas, a global leader and manufacturer of electrical and mechanical drives, motion control and automation technologies, has announced that it is relocating its electromechanical operations and logistics center from Glendale Heights, IL to its headquarters and production facility in Uxbridge, MA. The move is slated to be complete in August 2019, with full production of current g500 electromechanical product offerings expected to start at that time.

This transition is taking place to ensure production excellence, operational efficiency, and easy integration of electrical and mechanical systems. “With the consolidation of our production facilities, we’ll be able to take advantage of having our core operation and supply chain teams, as well as our management team, all under one roof,” said Ralph Rosa, president of Lenze Americas.

The Uxbridge, MA HQ location, currently the site of inverter production, has already met the highest level of process maturity in the Lenze Production System. This means that the recognized lean operation will be able to immediately, and successfully, onboard the new electromechanical production lines. Not only will this result in Lenze being able to better serve its customers, but also give the company the capability to expand its electromechanical product offering.

About Lenze Americas

Lenze is a global manufacturer of electrical and mechanical drives, motion control and automation technology. As a global specialist in Motion Centric Automation, we offer our customers products, drive solutions, complete automation systems, engineering services and tools from a single source. We are a leading provider of automation solutions to industries including: consumer packaged goods, converting and printing, automotive, material handling and logistics, robotics, and commercial pumps/fans. With a global network of engineers, sales representatives, and manufacturing facilities, Lenze is well-positioned to meet the motion control needs of customers worldwide. Lenze Americas, the American subsidiary of Lenze SE, is headquartered in Uxbridge, Massachusetts. Corporate global headquarters are in Hamelin, Germany.
